

## Liquid Rubber Tinting Instructions

Instruction for stores on how to tint our products:

- Liquid Rubber Polyurethane Deck Smooth/Textured Coating
- Liquid Rubber Color Waterproof Sealant
- Liquid Rubber Cool Foot

1. We have 2 bases:

a. #1 is our Medium Tint Base. Buy the Medium Tint Base  
Medium Base is for bright and dark strong/bold colors.

b. #2 is our White Base. Buy the White Color

The White Base is for very light shades example: Off-white, light greys, baby blue, pink, mauve etc.

2. Instructions for the paint manager:

### One-Gallon Can

a. Start slowly by using the formula for a quart (946ml) and add it to the one-gallon can. This allows the manager to adjust if necessary.

### Five-Gallon Pail

b. Start slowly by using the formula for five quarts (946ml) and add it to the five-gallon pail. This allows the manager to adjust if necessary.

c. Shake for 8-10 minutes then check for color. Adjust as required.

d. The pain manager knows how to adjust and then they add white for opacity and fill the can/pail.
